

LET'S TALK!

Asking your healthcare provider about OC-Auto® FIT

OC-Auto FIT is an at-home, noninvasive screening solution that looks for non-visible blood in the stool. Regular screening helps find signs of disease before symptoms occur, allowing you to get treatment early, when survival rates are higher.

Questions to ask your healthcare provider

- Am I at risk of having colon cancer?
- How does my age, race, or family history impact my risk?
- Is OC-Auto FIT right for me?
- How can I get OC-Auto FIT?
- When can I expect my results? How will I get them?
- I know that OC-Auto FIT is recommended annually. What can I do to stay on schedule for next year's screening?

Why choose OC-Auto FIT?

Easy at-home test

No preparation, restrictions, or special diet required

No changes to medication required

Checked annually, similar to breast and prostate cancer screening

After you receive your OC-Auto FIT kit

If your healthcare provider agrees that OC-Auto FIT is right for you, your kit may then be picked up in the office or received by mail. When you get your kit, check the expiration date on the sampling bottle, and use as soon as possible.

TIP

Keep your kit in your bathroom so it will be **ready when you are!**
